

LCD display / Built-in printer / USB

Made in U.S.A

First-class Quality Control System

We have established a first-class quality control system to supply the world most excellent autoclaves.

Dual Core Control System

This system can gather and process real-time data, monitoring the sterilization program and automatically adjusting the processing parameters, to ensure the safety of operators and autoclaves.

Power-off Protection

If the power shuts off during working cycle, the pressure release valve will start automatically to release the vapour from the chamber, you can take out sterilization loads safely. Operators safety is guaranteed.

- Printer is included
- The connection to STS-Data logger system allows to store the data on a PC.

Complete Sterilization guaranteed

Complete sterilization is the only value for an autoclave. We have the unique design to keep the sterilization temperature stable. The stability level of our autoclave complies with the CE standards.

Adjustable sterilization time

For special loads users can adjust sterilization time by themselves to ensure the complete sterilization of the loads. Our quickest sterilization takes only 12 minutes (including dry time).

Two Year Warranty

Each device is provided with 2 year warranty. We ensure 100% satisfaction to our customers.

Stainless steel chamber made of thick one-piece molded steel class.

Reversible rack

3 cassettes

5 cassettes vertically

ZA11-12L

Capacity	12L
Chamber size	20x36 cm
Display	LCD
Lock	Electrical & Mechanical
Product size	73x57x51 cm
G.W/N.W	59/51 Kg
Power	220V/50Hz 2.4 KW
Output	USB+RS232
Printer	thermal/stylus

ZA11-18L

Capacity	18L
Chamber size	25x35 cm
Display	LCD
Lock	Electrical & Mechanical
Product size	73x57x51 cm
G.W/N.W	61/53 Kg
Power	220V/50Hz 2.4 KW
Output	USB+RS232
Printer	thermal/stylus

ZA11-22L

Capacity	22L
Chamber size	25x45 cm
Display	LCD
Lock	Electrical & Mechanical
Product size	77x57x51 cm
G.W/N.W	63/55 Kg
Power	220V/50Hz 2.4 KW
Output	USB+RS232
Printer	thermal/stylus
